INTRODUCTION

Information Sources for International Business—a Directory, is the revision of an updated and considerably expanded version of an earlier publication, Secondary Data Sources for Australian Exporters which was originally produced for use by students of international marketing at the University of Technology, Sydney. The present publication goes well beyond international marketing and provides data on sources of information for all aspects of international business. It is also intended to be a companion to the text International Marketing—an Asia-Pacific Perspective Ed 4, by Fletcher, R and Brown L. (2008).
